

## **General cleaning and maintenance**

- Avoid sharp-angled toys, buckles, jewelry and pets, these can damage the fibers of the fabric.
- If there are loops or loose threads in the fabric, push them back into the fabric with a fine but blunt object.  
Under no circumstances should it be pulled or cut.
- Upholstery fabrics should be cleaned regularly like any other user object. Never let the pollution get too bad, but regularly clean the furniture carefully. Use a furniture brush and gently brush along with the nap.
- When vacuuming, do not use a hard floor brush, but a special upholstery nozzle in combination with low suction power and always rub with the nap (pool).
- In case of stains, first remove the solids as much as possible with a spoon. Immediately wet a terrycloth towel with lukewarm water, wring out and then place on the stain. Let the terry towel sit until the cloth has dried. The stain is sucked from the fabric into the cloth in this way. Never rub the fabric / stain. When the towel is saturated, replace it until the stain stops coming off, then leave the towel until dry.
- If there are specific stains, contact a specialist company that may be able to solve the problem (try any recommended cleaning product in a less visible place first).
- Make sure that the furniture / the fabric is never in direct sunlight, because of discolouration.
- For an even wear of the fabric, change the place of the cushions regularly and turn the cushions (if possible).
- Do not use fragrance fresheners for the fabric, as they can cause a chemical reaction.
- Jeans can stain light (white, ecru, etc.) and medium (beige, sand, etc.) colors.

# PIQUET

## General product specifications:

Product group	Flat weave
Composition top cloth	40%VI 22%PES 20%CO 18%LI
Composition undercloth	n/a
Bonding / Coating	n/a
Cloth weight	588 g/lm
Commodity code	55169300
Minimal width	138 cm
Roll length	25 meter
Number of colours	32

## Photo

PIQUET

## General product specifications:

- rich and natural aspect
- combination of natural and synthetic yarns
- soft and full grip
- suitable for loose upholstery

## Information about the product group:

Flat fabrics are woven fabrics in which 2 yarn groups are at right angles to each other. The closer the yarns are, the higher the density, the heavier the fabric. In addition, the thickness of the yarns is also important with regard to the construction and the weight of the fabric.

## Test specifications:

Wear resistance EN ISO 12947 1 & 2	<b>28000</b> revs until thread break Martindale
Pilling EN ISO 12945-2	Class <b>4-5</b> 2000 Revs
Lightfastness EN ISO 105 B02	Light Colours <b>4</b> Middle Colours <b>4</b> Dark Colours <b>4</b>
Tensile strength EN ISO 13934-1	Tether <b>1500</b> Newton Woof <b>710</b> Newton
Tear strength EN ISO 13937-3	Tether <b>49</b> Newton Woof <b>54</b> Newton
Suture strength EN ISO 13936 2	Tether <b>3,3</b> mm Woof <b>3,8</b> mm
Fastness to rubbing EN ISO 105 X12	Class <b>3</b> Wet Class <b>4-5</b> Dry
